Customer Reviews

I bought this book for my masters class in Educational Assessment. Because I am in Early Childhood, I thought the book would be helpful. I began reading the first chapter of the book and I noticed it was about Designing curriculum in early childhood education. As I continued to read, I saw that beginning of the second chapter was missing. The book is put together completely wrong. The

publishers inserted the wrong first chapter into the book. Also the book has a million typos, spelling, and grammar errors. If you do not want the hassle of returning this book, do not bother buying it. You will be disappointed.

My book arrived with a big slash across the front cover that went into the book 2 pages deep and was supposed to be brand new. The package was held an hour away and took 3 days to get to my house. This item is damaged and not brand new like the description described.

I purchased this book for an early childhood course. I felt that it meets the need for basic early childhood assessment information.

Great tool for refreshing me about all the assessment process that I can use for helping create a welcome environment and appropriate activities for my students. Thanks for the information.
