Case Studies T/A Clinical Manifestation And Assessment Of Respiratory Disease

Synopsis

Focusing on assessment through therapist-driven protocols, this valuable tool provides an overview of the assessment process and fundamentals needed for success. It offers discussion of the top five treatment protocols: oxygen, hyperinflation, bronchial hygiene and bronchodilator therapies, as well as mechanical ventilation. Using a case study approach, students learn to manage an entire case from beginning to end. Each time they assess the patient, they use the SOAP format: Subjective, Objective, Assessment, and Plan reasoning, giving them practice in documenting history and developing care plans.

Book Information

Paperback: 304 pages

Publisher: Mosby; 2 edition (April 18, 2001)

Customer Reviews

Thanks for this book, it has helped me immensely in my studies!! It arrived on time and has been a staple in my book work!! So glad I bought it!!

The book I received was in decent condition but it had writing inside of it

Great book for an RT.
